**88%
Pure**
Omega 3 Fish Oil
Non-Prescription
Pharmaceutical-Grade

One of the most **concentrated** fish oils available, WINOmeg3complex™ is concentrated by a patented enzyme process and two molecular distillations which produce a pharmaceutical-grade oil with more than 85% omega 3 fatty acids. Compare this to most products on the market that are 30%-35% concentrated, and even to most of the pharmaceutical-grade fish oils with concentrations of 60%-65%

The raw material for WINOmeg3complex is fish oil from fisheries on the west coast of South America, where nutrient rich cold water from the Antarctic region runs northwards in the Humboldt Current producing fish oil that is high in omega-3 fatty acids and low in industrial pollutants.
